

Patrick Boisseau

Member of the IHI JU Governing Board

Director General, Strategic Initiatives

MedTech Europe

Patrick has joined MedTech Europe as of September 2019, as Director, EU Research & Innovation Partnership Policies. He develops, promotes, represents and leads the industry in EU Research and Innovation Partnerships or Programmes, working on European projects and interacting with the European Commission in the set-up, follow-up and coordination of European funding(ed) projects and any other similar EU initiatives. Patrick leads particularly MedTech Europe activities and representation in critical framework programmes such as Horizon 2020, Horizon Europe, EIT Health and others.

Since January 2021, Patrick is promoted to Director General, Strategic Initiatives at MedTech Europe and leads the development of key Industry Strategic Initiatives: MedTech Europe Value-Based Health Care deployment, Digital Health expansion and finalising the EU/Medtech industry public-private partnership to support research and innovation in the healthcare industry. Patrick was educated as an agronomist and as an engineer in biology.

Patrick managed a significant number of EU collaborative projects, research infrastructures, coordination actions and networks of excellence. His scientific and technical expertise are in nanomedicine, drug delivery, medical imaging and innovative medical technologies.

Patrick was educated as an agronomist at the National Agronomic Institute Paris-Grignon, and as an engineer at ENGREF (École Nationale du Génie Rural des Eaux et des Forêts), together with a specialisation in DEA Nutrition Humaine at the University PARIS VI (France).
