

# Giulio Pompilio

**Member of the IHI JU  
States Representatives Group**

**Scientific Director**

**Centro Cardiologico Monzino IRCCS,  
Milan Italy**

Scientific Director of the Centro Cardiologico Monzino IRCCS hospital (Italy), the largest European stand-alone cardiovascular centre in Europe.

Internationally known as a pioneer in Italy in gene therapy for peripheral arterial diseases and cardiac regenerative therapy with cardiac stem cells, he is the head of one of the most scientifically productive cardiovascular laboratories in Europe. Besides the intense clinical activity, his scientific interests encompass the understanding of the pathogenesis of the inherited cardiomyopathies, and the development of novel therapies to prevent sudden cardiac death.

Professor Giulio Pompilio graduated in Medicine and Surgery and specialized in Cardiac Surgery at the University of Milan in 1989 and 1994, respectively, with highest honours.

He is currently Scientific Director of the Centro Cardiologico Monzino IRCCS hospital, Senior Staff Surgeon and Director of the Laboratory of Vascular Biology and Regenerative Medicine Unit at Centro Cardiologico Monzino IRCCS, Associate Professor of Cardiac Surgery at University of Milan, School of Medicine.

Noteworthy appointments:

President-elect of the Working Group on Cardiovascular Regenerative and Reparative Medicine (CARE) of the European Society of Cardiology (ESC) (2022-2024),

Italian Alternate Delegate at the EMA Committee for Advanced Therapies (CAT) (2020-2021),

Scientific Director (2011-2016) of the Research Foundation for Amyotrophic Lateral Sclerosis (AriSLA),

Member of the Board of Directors of Biomedical Research Foundation of Lombardy Region (2015-2016 FRRB),

Co-founder Oloker Therapeutics, biotechnology start-up in cardiovascular cell therapies,

Fellow of the European Society of Cardiology (FESC).
