

Jasper Claessen

Member of the IHI JU
States Representatives Group

Team coordinator – Market Entry,
Research and Regulatory Affairs

Department of Pharmaceutical Affairs,
Dutch Ministry of Health, Welfare and
Sports

Jasper Claessen (PhD) is coordinating policy advisor at the Department of Pharmaceutical Affairs at the Dutch Ministry of Health. He works on policies regarding the development of innovative medicines, with a special focus on the synergy between public and private interests in medicine development. He coordinates the Dutch policies aimed to stimulate R&D into novel antimicrobials, and represents the Dutch Ministry of Health in several national and international organizations that aim to tackle the AMR crisis. Furthermore, he coordinates the Dutch crisis response team aimed at making new COVID-19 medication accessible, and coordinates a comprehensive study into the financial ecosystem surrounding novel drug development. Prior to joining the ministry, he worked for several years as an innovation consultant building public/private R&D partnerships, and attracting funding for drug development programs and other health innovation initiatives. Trained as a molecular biologist, Jasper Claessen spent many years as an academic researcher at MIT and Cambridge University.
